

## Duct tape wallet

<https://innerchildfun.com/2018/02/make-duct-tape-wallet-easy.html>

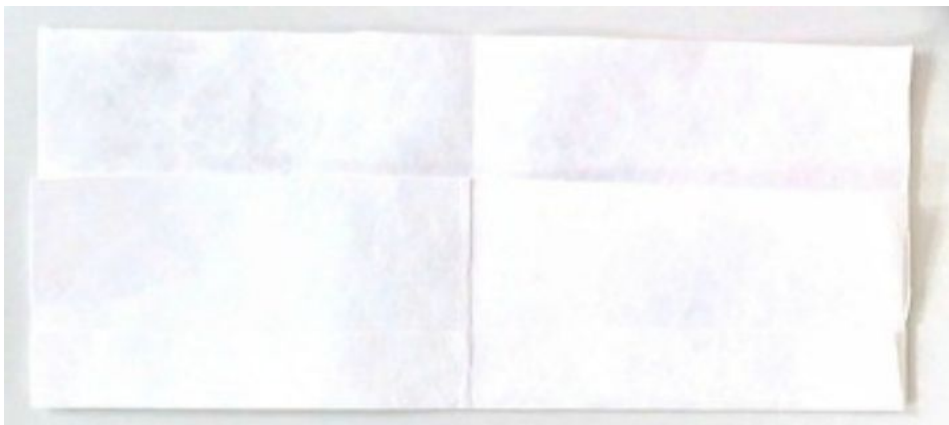

Materials needed:

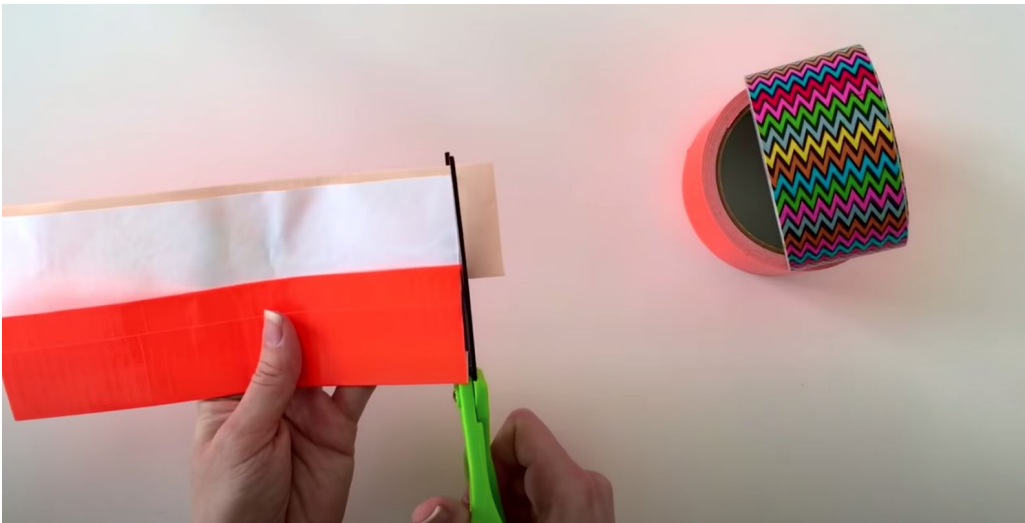

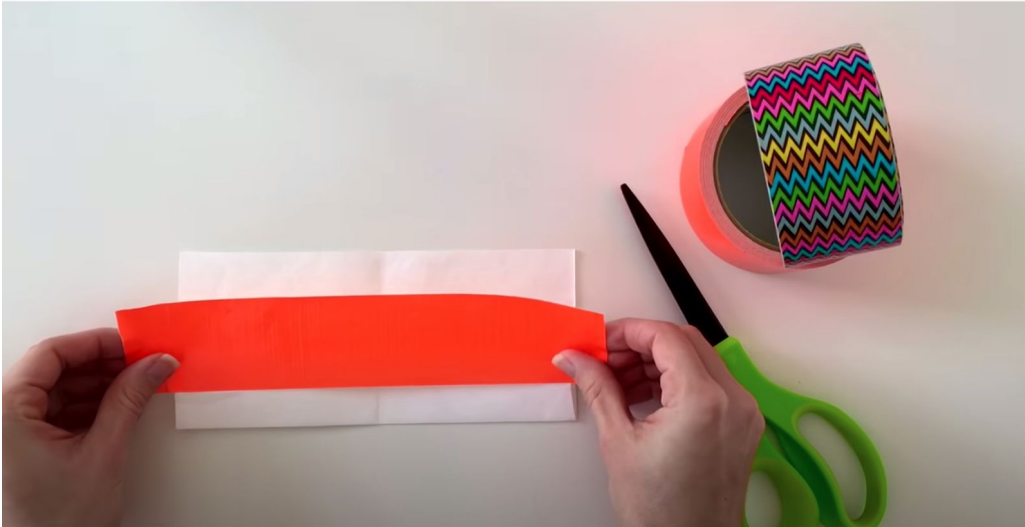

- Construction paper or thin cardboard
- Duct tape
- Scissors

Here are the step by step instructions with pictures. You can also watch the youtube tutorial here: <https://www.youtube.com/watch?v=nOYfAXX0GwQ>.

1. Cut a construction paper or thin cardboard so that it measures 15 cm tall and 20 cm wide.
2. Fold in half on the tall side, then open it again.
3. Fold from the bottom wide side up and leave about 2 cm.

4. Start layering the duct tape on top of the envelope, making sure you are leaving tape at the top to seal. Trim or fold the tape that is sticking out from the sides.

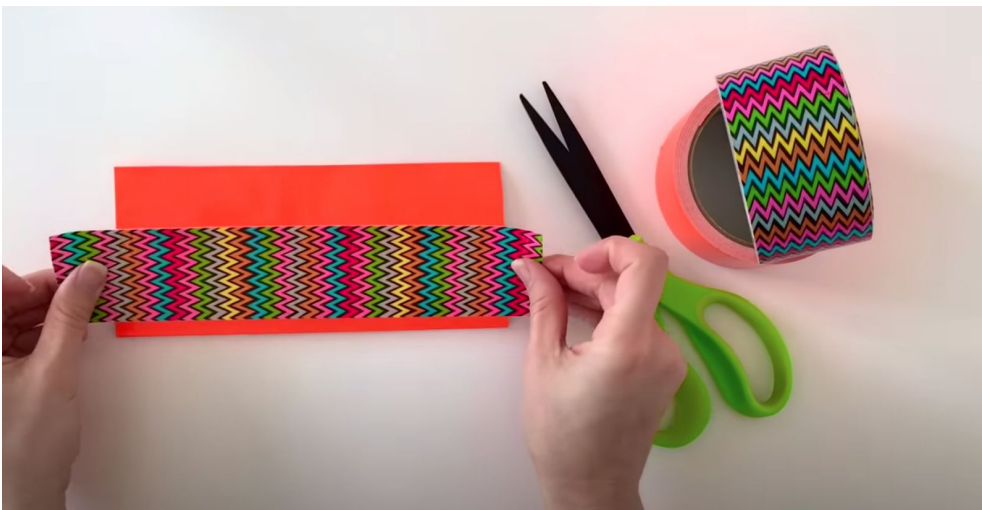

5. Fold the tape at the top.

6. Repeat the same thing on the other side of the envelope.

7. Optional - you can add another color of duct tape on the front of your wallet and trim or fold the sides.

8. If you haven't folded the sides, place duct tape on the side and fold it in.

9. Fold wallet in half.
