

## Air Dry Clay Nature Imprints

### RECIPE: MAKE YOUR OWN CLAY

- 1 cup Baking Soda
- 1/4 cup cornstarch
- 3/4 cup water

Yep that's it! Combine the ingredients and stir, then you just need to set it on your stove top bring it to boil while stirring consistently. Once you see it bubbling turn it down to about medium and keep stirring until the mixture turns thick and is too hard to mix. This should take about 5-6 minutes.

Remove and let it cool in a bowl. Cover it with some saran wrap while you're working on organizing your plants because it dries pretty quick.
